

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) A coating agent composition, including comprising:
an emulsion containing a water-based emulsion and fine spherical particles, the water-
based emulsion comprising:

(A) polydiorganosiloxane having a viscosity of 50 to 10,000,000 mPa • s at 25°C
and having both terminal ends blocked by hydroxyl groups,

(B) polyorganohydrogensiloxane having at least three hydrogen atoms bonded to
silicon atoms in one molecule,

(C) a curing catalyst, and

(D) chlorinated polyolefine and/or acryl-modified polyolefine,

~~(E) fine spherical particles comprised of a rubber like elastomer having hardness
of less than 90,~~

wherein the fine spherical particles ~~(E) are mixed to disperse into the emulsion~~
comprise an elastomer selected from the group consisting of a cross-linked urethane-based
polymer, a cross-linked methyl methacrylate-based polymer, a cross-linked acrylic ester-based
polymer, and a cross-linked butyl methacrylate-based polymer, the elastomer having hardness
of 60 to 80, and are mixed to disperse into the water-based emulsion.

2. (Cancelled)

3. (Previously Presented) The coating agent composition according to claim 1,
wherein the total content of the chlorinated polyolefine and the acryl-modified polyolefine of
the Components (D) is 5 to 150 parts by weight to 100 parts by weight of the
polydiorganosiloxane of the component (A).

4. (Currently Amended) The coating agent composition according to claim 1,
wherein the content of the fine spherical particles of the elastomer ~~[(E)]~~ is 10 to 150 parts by
weight to 100 parts by weight of the polydiorganosiloxane (A).

5. (Previously Presented) The coating agent composition according to claim 1, further comprising alkylamine oxide and/or water-insoluble amino group-containing polyorganosiloxane.

6. (Currently Amended) The coating agent composition, according to claim 1, wherein the coating agent composition is coated on a mold part formed of ~~an~~ a foamed or non foamed ethylene-propylene-diene ternary copolymer.

7. (Cancelled)

8. (Cancelled)

9. (Cancelled)

10. (Cancelled)
